wherein particles of said crystallized solid polyol fatty acid polyester have a diameter of from about 1 microns to about 50 microns, and wherein the flowable nondigestible oil composition has a Consistency in a temperature range of 20-40°C of less than about 30 P.sec$^{(n-1)}$, and wherein the solid polyol fatty acid polyester is crystallized while shearing the nondigestible oil.

Please amend Claim 2 as follows:

2. (Twice Amended) A flowable nondigestible oil composition comprising a liquid polyol fatty acid polyester having a complete melt point less than 37°C, and a crystallized solid polyol fatty acid polyester having a complete melt point of at least about 37°C, said solid polyol fatty acid polyester comprising a plurality of crystallized spherulites comprising a solid saturated polyol polyester within the liquid polyol fatty acid polyester, wherein particles of said crystallized solid polyol fatty acid polyester have a diameter of from about 1 microns to about 50 microns, and wherein the flowable nondigestible oil composition has a Consistency in a temperature range of 20-40°C of less than about 30 P.sec$^{(n-1)}$, and wherein the solid polyol fatty acid polyester is crystallized in less than about 5 hours.

Please amend Claim 7 as follows:

7. (Amended) The flowable nondigestible oil composition according to Claim 1 wherein the Consistency in a temperature range of 20°-40°C is less than about 25 P.sec$^{(n-1)}$.

Please amend Claim 8 as follows:

8. (Amended) The flowable nondigestible oil composition according to Claim 3 wherein the Consistency in a temperature range of 20°-40°C is less than about 20 P.sec$^{(n-1)}$.

Please amend Claim 9 as follows:

9. (Amended) The flowable nondigestible oil composition according to Claim 7 wherein the Consistency in a temperature range of 20°-40°C is less than about 20 P.sec$^{(n-1)}$.

Please amend Claim 10 as follows:

10. (Amended) The flowable nondigestible oil composition according to Claim 8 wherein the Consistency in a temperature range of 20°-40°C is less than about 10 P.sec(n-1).

Please amend Claim 11 as follows:

11. (Amended) The flowable nondigestible oil composition according to Claim 9 wherein the Consistency in a temperature range of 20°-40°C is less than about 10 P.sec(n-1).

Please amend Claim 41 as follows:

41. (Twice Amended) A flowable nondigestible oil composition comprising a liquid polyol fatty acid polyester having a complete melt point of a less than about 37°C, and a solid polyol fatty acid polyester having a complete melt point of at least about 37°C, wherein the solid polyol fatty acid polyester is in the form of crystallized spherulitic particles, wherein said crystallized spherulitic particles have a diameter of from about 1 microns to about 50 microns, and wherein the flowable nondigestible oil composition has a Consistency in a temperature range of 20-40°C of less than about 30 P.sec(n-1).

Please amend Claim 42 as follows:

42. (Amended) The flowable nondigestible oil composition according to Claim 41 wherein the Consistency is less than about 25 P.sec(n-1).

REMARKS

Application Amendments

By the amendments presented Claims 1-2, 7-11, and 41-42 have been rewritten to more particularly and distinctly claim the subject matter that Applicants regard as their invention.
